EDUCATION

INHA UNIVERSITY in TASHKENT (IUT)
UZBEKISTAN
Frontend, Software Engineering

TASHKENT, 2025

EXPERIENCE

Mimsoft Company

May 2025 - Present

React.js, Next.js, Vue.js, Nuxt.js, Frontend

- Engineered high-performance Single Page Applications (SPA) using Vue.js, implementing lazy loading and code-splitting strategies, which reduced initial page load time by 40% (LCP < 1.5s).
- Designed a modular frontend architecture to integrate seamlessly with microservices, creating reusable UI components that accelerated feature delivery speed by ~25%.
- Optimized complex state management (using Pinia/Vuex) for high-frequency data updates, ensuring real-time data synchronization with backend APIs and eliminating UI lag during peak traffic. **laPay and 6sekund** admin panels.

MARS IT SCHOOL

March 2024 - Sep 2024

Frontend Mentor for Young Learner (Ages 8 - 15)

- Guided over 20 students in creating interactive games using HTML, CSS, JavaScript and Scratch, simplifying complex frontend concepts into fun, hands-on activities
- Fostered creativity and problem-solving skills, leading 85% of students to successfully complete projects with exceptional engagement.
- Maintained strong communication with parents, boosting satisfaction by 25% through regular progress updates and personalized mentorship.

Uzcard

February 2023 - March 2024

Frontend Developer Intern

- Learned fundamental design patterns and enhanced coding skills through real-world projects leading to 80% of students completing the course with excellent results.
- Collaborated with a team of senior and mid-level Front-end developers, gaining valuable insights and practical knowledge in advanced development techniques
- Gained hands-on experience with modern Front-end frameworks and tools, ensuring best development practices

PROJECTS

TextUp – Sms Platform

Frontend Developer

Redesigned the entire TextUp project UI, added smooth animations, improved content management, and fixed the authentication button. Implemented the changes using Next.js, TypeScript, Tailwind CSS, and AOS (Animate on Scroll). Delivered a more modern, responsive, and user-friendly interface with improved performance and better user experience.

Technologies: Next.js, TypeScript, Tailwind CSS, AOS (Animate on Scroll)
